

Tutorial: Enabling on-demand print-friendly certificates for a previously held med cert class

Aug. 8, 2018

Note: These steps are for classes which have been created, administered and for which the students have been certified. If you are creating a new class, use the Class Creation Tutorial Walkthrough and/or video on our Manuals and Guides page.

First, use your web browser to access your organization or region's LMS site. Sites are usually named [organization code].lmscheckout.com. If you don't know your organization's site, please contact the MCCA office.

Next, use the link in the upper right to log in. Your username will always be your email address. Use the "forgot password" link if you have forgotten your password.

Using the blue navigation bar toward the top of the screen, click "Manage Courses." Then click "Live Classes in the black menu bar on the left. This will display your class list.

You should now see a list of all students certified for this class. In each student record, there are two buttons – the one on the left displays a print-friendly certificate in the browser window (which you can save as a PDF); the one on the right resembling an envelope emails the certificate to the student.
